- Building the interface from the Figma template.
- Learn about the workflows, source code management
- Implemented functions: data addition, modification, and deletion
- Worked on Single Page Application

Software Engineer Intern

Oct 2021 - Dec 2021, Smart Viet Software Solutions Company Limited, Hanoi, Vietnam

- Designed and modified application interfaces based on Figma design
- Explored the workflows of Android applications
- Implemented basic functions: data addition, modification, and deletion
- Worked on navigation

Personal Projects

Feb 2024, Portfolio page

- Technologies Used:
 - ReactJS, CSS
 - Deploy by Github pages
- Live demo: <https://anhhp.io.vn>
- Source code: <https://github.com/anhhp0/portfolio>

Jan 2024, Landing Page

- Technologies Used:
 - ReactJS
 - Emotion/Styled components
 - Twin.Macro, Tailwind with responsive
- Live demo: <https://beautice-twinmacro.vercel.app/>
- Source code: <https://github.com/anhhp0/BeauticeTwinMacro>

May 2023, Social Media Website

- Technologies Used:
 - Front-end: ReactJS, React Formik, DOM, MaterialUI
 - Back-end: NodeJS, Express, RESTful API
 - Database: MongoDB
- Main Functions:
 - Managed state and handled asynchronous operations with Redux Toolkit
 - Authenticated users via JWT
 - Handled forms and data validation

- CRUD, navigation
 - Posting, image uploading, liking posts, and viewing user profiles
 - Single Page Application
 - Responsive.
- Source code: <https://github.com/anhhp0/newfeed>

Apr 2023, Dashboard Page

- Technologies Used:
 - Front-end: ReactJS, DOM, MaterialUI
 - Back-end: NodeJS, Express
 - Database: MongoDB
- Main Functions:
 - Displayed data retrieved from the database
 - Generated charts from data using the Nivo library
 - Implemented search, filter, and pagination
 - Single Page Application
 - Responsive.
- Source code: <https://github.com/anhhp0/dashboard>

Sep 2021 – Nov 2021, Online Figure Shop

- Technologies Used:
 - Front-end: HTML, CSS, Bootstrap
 - Back-end: PHP, executed via Xampp
 - Database: MySQL
- Main Functions:
 - User: registration, login, product information viewing, product filtering, adding products to the cart, coupon entry, and payment.
 - Admin: CRUD operations for user information, products, and coupons
 - Working with session
- Source code: https://github.com/anhhp0/figure_shop_projectAssi

Aug 2020, Hotel management application

- My tasks:
 - Problem, use case specification
 - Create database (data tables, entity-relationship diagram)
 - Create form: Employee, customer and service information
 - Compilation and report
- Technologies Used:
 - C#
 - SQL
 - 3-layer architecture
- Main Functions:
 - Login
 - Enter information into the forms
 - Filter, searching, saving, addition, modification, deletion

Skills

- Front-end: HTML, CSS, JavaScript, ReactJS, Twin.Macro, Emotion/Styled Components, Material UI
- Back-end: NodeJS, Express
- Databases: MySQL, MongoDB
- Git, JWT, RESTful API, reading and understanding English documentations
